# Torque Wrenches

## T-Torker®

For repetitive jobs requiring identical torque settings our T-TM provide and audible overrun when the factory preset torque is reached. These convenient wrenches offer fast, easy, one handed tightening in the right hand direction. The T shape creates effective leverage. Flanged reversing collar disengages the tool for conventional backing off and loosening. All mechanisms are sealed in die-cast handle and lubricated for the normal life of the tool. Available in Utility, Industrial (1/4" male drive) and ratchet only models.

## T-T Model

Specifically designed for US-style No-Hub cast iron soil pipe installations. 5/16" Hex socket hardened to 42-48 Rc and forged to end of drive shaft. Factory preset to 60 or 75 inch pounds.
